Professional Summary

Accomplished science and technology leader with over 15 years of experience directing genomics, advanced analytics, and strategic intelligence for global R&D. Proven in building and mentoring high-performing teams to drive innovation and competitive advantage. Expert in developing technology strategy, leading transformative initiatives, and fostering a culture of accountability. Deep knowledge of scientific intelligence and cross-functional collaboration to accelerate and protect innovation.

Professional Experience

Bayer Crop Science – Chesterfield, MO

Lead Scientific Advisor, Regulatory Sciences (Aug 2024 – Present)

- Played a core leadership role in aligning **\$60M+ in annual R&D IT investments** with Bayer's digital transformation, enhancing strategic decision-making.
- Guided teams in modernizing workflows with scalable data platforms and **GenAI**, accelerating product registration and enabling data-driven decisions.
- Coached teams on best practices for engaging with external data and technology partners to drive key project decisions.

Head of Data Systems, Regulatory Sciences (Jan 2021 – Jul 2024)

- Architected and delivered Bayer's first regulatory data lake and governance framework, improving data quality to accelerate global safety assessments.
- Developed team expertise in compliant data acquisition, analysis, and delivery, aligning with FAIR principles to accelerate innovation.
- Served as the primary escalation point for data compliance issues, partnering with Legal and IT to ensure fair and confidential resolutions.

Decision Science Lead, Biotechnology (Jan 2018 – Jan 2021)

- Led and mentored global teams supporting a biotech product pipeline exceeding **\$10B in potential sales**.
- Pioneered digital phenotyping platforms and advanced analytics to accelerate product advancement, aligning IT and Data Science roadmaps with business goals.
- Managed and developed a talent pipeline by attracting and selecting individuals with critical skills in data science and engineering.

Monsanto Company – St. Louis, MO

Genomics Data Analytics Lead (Dec 2016 – Jan 2018)

- Led machine learning initiatives in trait discovery, developing and implementing technology strategy to shorten product development timelines.

- Fostered a collaborative culture to drive innovation, recognized with the **2018 Monsanto Technology Above & Beyond Award**.

Genomics Analytics Automation Lead (May 2015 – Dec 2016)

- Spearheaded the cloud migration of bioinformatics workflows, enhancing operational efficiency and empowering scientists.
- Managed end-to-end NGS workflows, demonstrating strong cross-functional leadership.
